

**Amendments to the Specification:**

Please amend the paragraph at page 2, starting at line 3, as follows:

There has been one segment of the population that has largely been excluded from the computer revolution, the young child. This is true primarily for two reasons. First, young children have not yet developed the ~~metal~~ mental capabilities or the motor skills to interact well with conventional computers, which require data to be entered, for example via the key board or mouse, in a fixed format. Secondly, young children are interested and entertained by simple sensory input, and the vast resources offered by conventional computers are generally too advanced to be of interest to them.
